DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

This application contains claims directed to the following patentably distinct species:

I. Species figure 2, which are directed towards recognizing an individual by calculating the change in the feature points. Claims 1-5 and 10-14 are directed to this species:

II. Species of figure 11, which are directed towards recognizing an individual based on the eigenvalue contribution rate. Claims 6-9 and 15-18 are directed to this species.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

3. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 2624

the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).
